Tomatillo Verde	70 days, Green fruit inside tan husk, for green Mexican sauce, globe, 2 oz, indet
* Also available as GRAFTED	Grafted tomatoes produce the same fruit as the variety noted but are grafted onto a stronger, more disease- and drought-resistant root stalk for higher yields. Grafted tomatoes are in taller 4" pots.
Determinate: compact height (~ 3 - 4'), stop growing when fruit sets on the top bud. Tomatoes ripen at about the same time (within 1- 2 weeks) and require a limited amount of staking for support. Suited for container planting. Don't prune.	
Indeterminate: will grow and produce fruit until killed by frost; can grow 6-12' tall. Will bloom, set new fruit and ripen fruit all at the same time. (Go to Tomatofest.com for more information)
